DIGITAL HEALTH SOLUTIONS FOR HOSPICE & PALLIATIVE CARE

Purpose-built to address the needs of hospice and palliative care organizations, Citus Health is a cloud-based platform with a suite of solutions that helps your organization more efficiently and securely communicate and collaborate with real-time messaging tools and digital workflows to ensure a tightly connected circle of care that improves the patient's end-of-life experience.

Collaborate Securely in Real-Time with Clinicians and Family Members

Citus Health delivers instant communication with HIPAA compliant secure, event driven messaging tools via any smart device.

- Automate person-to-person or group conversations
- Route messages from family members and clinical care teams to the right person at the right time
- Collaborate in real-time to solve issues via secure video chat with family members, clinicians and HME suppliers

Streamline Interdisciplinary Communications and Workflows

Citus Health provides real-time communication and digital workflows to drive efficiencies throughout your organization.

- Automate care team workflows with imbedded logic and forms that improve care coordination
- Invite referral partners, physicians, SNFs, and home health agencies into the circle of care for seamless, real-time collaboration
- Communicate with HME suppliers in real-time to ensure timely delivery and pick up of equipment

Automate Manual Processes to Improve Productivity and Accelerate Billing Cycles

Citus Health provides real-time electronic signature capture and intuitive forms that help eliminate delays.

- Obtain signed consent for care and on proof of delivery tickets
- Track timeliness of required signature documents
- Integrate documents and progress notes to EMR systems for audit and streamlined billing

Empower Clinical and Family Teams

Citus Health helps improve quality of care and ease the burden of regulatory reporting with educational resources and accurate data collection.

- Offer on-demand education and bereavement resources
- Proactively capture quality of care data with satisfaction surveys
- Empower family members to respond to care coordination and supply requests on behalf of patients
